

The Tympa Difference

TYMPAHEALTH™

Redefining ear and hearing health. For everyone.

www.tympahealth.com

The only fully comprehensive ear and hearing health solution

At TympaHealth, we empower healthcare professionals to deliver expert-led services that are accessible, scalable, and transformative.

We're not just improving technology - we're redefining ear and hearing health for everyone.

Speak to our team for guidance and support on integrating ear and hearing health into your business

Built on innovation and clinical expertise

The Tympa is an end-to-end tech enabled ear and hearing health solution.

High-definition video otoscopy

Capture high-definition images and video of the outer and middle ear with HD video otoscopy. Empower both you and your patients with clearer understanding and greater confidence

Microsuction wax removal

Perform quick, gentle, and safe microsuction wax removal using our integrated suction system – delivering clinical-grade results in any setting

Hearing checks

Run a 4-frequency hearing check (500Hz to 4,000Hz), offering fast, accurate insights into hearing health – all from a single device

Referral to specialist support

Make instant in-app referrals for patients who need further audiology support – no desktop systems or extra admin required

Digital patient record

Store and access examination records securely in the cloud, making it easy to review patient progress and share results with specialists when needed

Speak to our team to discover how our innovative, clinically-proven technology can transform your healthcare practice

Specialist-led training, built for confidence

We provide accredited training developed by ENT and audiology experts, to give practitioners the knowledge and support to deliver safe, effective, and high-quality care.

- Developed by ENT specialists to ensure adherence to the highest clinical standards
- Led by professionals with real-world experience in community-based care
- Focused on safe, confident service delivery across all settings
- Supports ongoing development through clinical audit, expert guidance, and continuous oversight

Connect with our academy team to learn how our expert-led, accredited training can elevate your practice and enhance patient outcomes

Ongoing support from a team you can rely on

With TympaHealth, support doesn't end after onboarding – it's an integral part of the experience.

Every practitioner in the TympaHealth network benefits from continuous access to a dedicated team of clinical and technical experts who are ready to assist.

- First-line clinical advice from ENT-trained audiologists
- Second-line guidance from ENT surgeon partners for complex queries
- Ongoing clinical audits and reviews to uphold quality
- Our framework gives practitioners direct access to expertise that helps improve care pathways and enhances clinical

Speak to our team to learn about the dedicated support you can receive from ENT-trained audiologists

Designed for data security and patient safety

Patient confidence is essential – and data protection is a key part of that. TympaHealth has been designed with robust security measures that meet NHS and GDPR standards, ensuring that sensitive information is handled safely and responsibly at every stage.

We are the only provider that is DTAC compliant ensuring the highest level of clinical safety and data protection. Practitioners can deliver care knowing they are supported by a system that puts patient safety and digital security first.

and how we protect your patients and practice

A proven approach to community healthcare

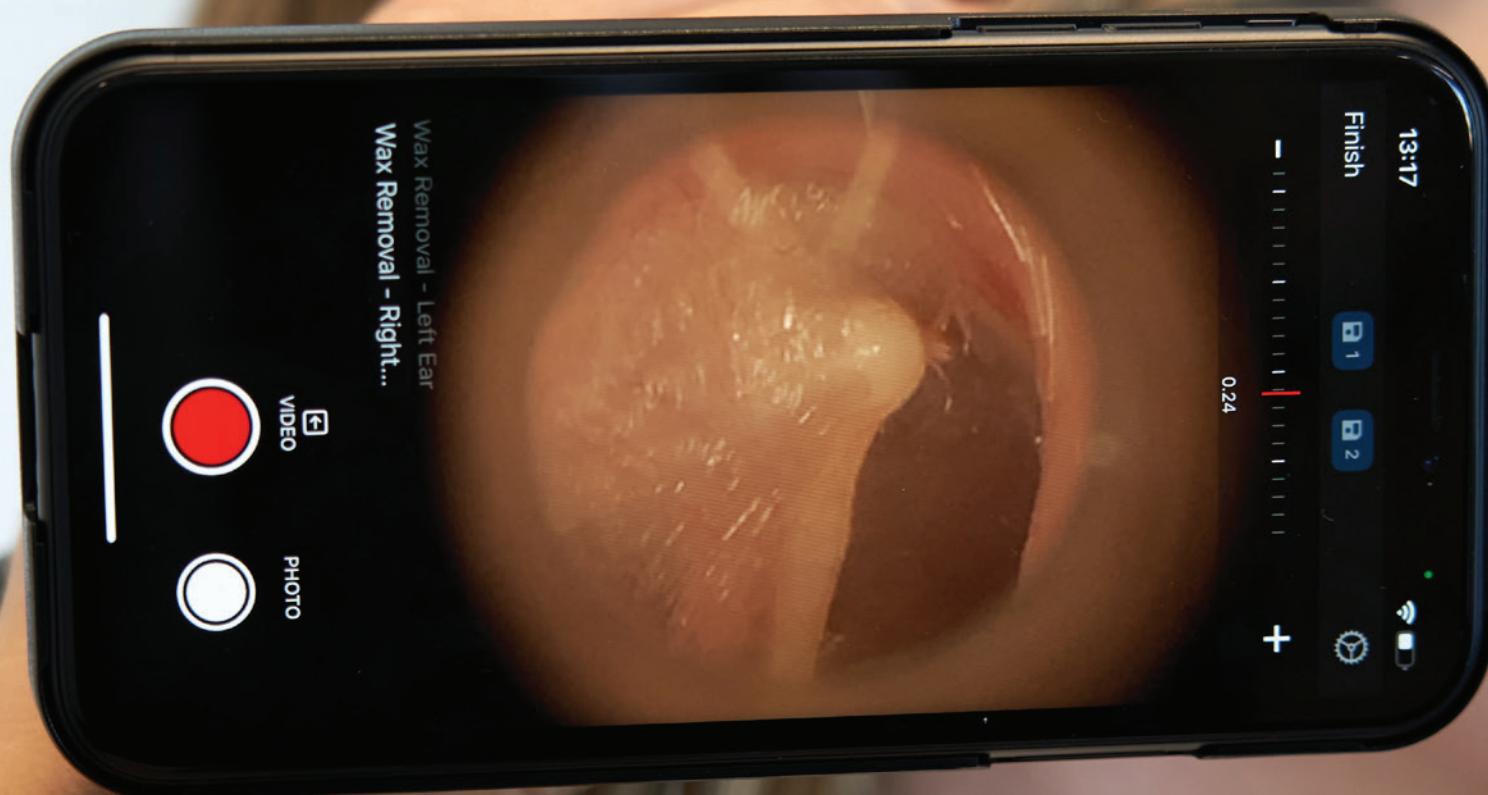

The highest standards of ear and hearing health should be accessible to all - and trusted providers across the UK partner with TympaHealth to make that a reality.

- Some of the biggest pharmacy groups in the country partner with TympaHealth
- Healthcare professionals, including the NHS trust our clinical expertise
- The UK's largest audiology groups trust our platform to deliver exceptional care
- Our technology facilitates over 40,000 patient appointments every month – and growing

From independent pharmacies and sole traders to large care homes and multi-site healthcare providers, TympaHealth delivers tailored solutions compliant with the highest clinical safety standards.

Speak to our team to explore how our proven solution can enhance ear and hearing health care in your community

Tympa is the only fully comprehensive ear and hearing health solution, designed to seamlessly integrate into pharmacies, care homes, and audiology clinics, whilst providing new service models for healthcare professionals.

That's the Tympa difference.
